

NORTHWEST LIMITED

BOAT RACING

The history of powerboat racing in the Northwest draws a colorful picture. Legends like Ron Musson, Bill Muncey, and Chip Hanauer started their careers right here in Region 10 limited boat racing. Northwest Region 10 has always been a stepping stone for the champions of the unlimited ranks.

As the name implies, these racing craft must conform to very strict rules. Each class is restricted to size of engine, type of fuel, length and weight. By equalizing, as much as possible, the boats and engines, emphasis is placed on good driving and expert maintenance of equipment.

BOAT SPECIFICATIONS

HYDROPLANES

CLASS	LENGTH/WT	MPH	ENGINE

CLASS	LENGTH/WT	MPH	ENGINE
Super Stock / SS	16' / none	100	427ci, stock
Pro Stock / PS	16' / none	120	mod, 500ci, no trb

UNLIMITED LIGHT RACING

The Unlimited Light (UL) hydroplanes are the fastest growing class of race boats in the country. The lights average 24' in length, and have dynamic, powerful big block automotive engines or blown alcohol engines that generate 900 horsepower and reach speeds of 150 mph. Their roostertails hang in the air for 50 yards; the thunder of their motors is deafening and the excitement is electrifying! They have been a support class on the Unlimited hydroplane circuit for the past six years at such venues as Seafair, the Detroit Gold Cup, the Tri-Cities Water Folies, and San Diego's Bayfair. In addition to the Northwest camps, teams from California, Ohio, Detroit, and Canada are expected to compete at Tastin' N Racin'.
